- SERVICES

From the moment you enter an Ed Bozarth dealership you will notice a difference. At Ed Bozarth Chevrolet they promise to provide a quality experience and a quality vehicle. The professional sales staff is fully educated on product offerings to ensure continued satisfaction.

Office Furniture & Design Centers worked with Mark Miller on their new Chevrolet building just off of Hwy 6 & 50. This beautiful building holds twelve offices on the main floor that were furnished with Artopex brand desking.

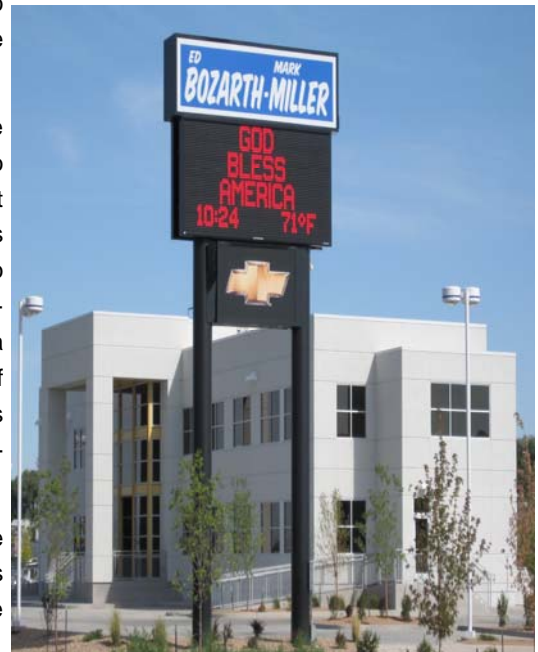

Our salesman, JR Keller, worked diligently on this project to provide the best product and service at the right price.

Like with many of our projects, we first met with the customer to determine their needs. Within a few days our CAD designers are able to construct multiple options and office layouts to provide to the customer.

Because we have access to so many different manufacturers we were able to provide the dealership with a wide variety of product choices to fit their individual needs.

Shortly after the furniture was installed in the

new building, we were called upon a second time to furnish the service facility. With five new work stations recently installed, the service department is now working in style!

PRODUCT: ARTOPEX AIR

Air is a new generation of office furniture.

Air is a 21st century product.

Air is a modular desking system where each component serves multiple functions.

With this new line of furniture, storage is the structural element. Each storage unit can support a surface and/or serve as a divider. Cushions can be added to the base storage to create meeting spaces or guest seating. Modern, simple and efficient lines maximize the use of work surfaces in the space.

SERVICES

How long have you been sitting in your same office chair and can't seem to get comfortable? Or, perhaps you have recently purchased new task chairs for your employees but you still hear complaints about their comfort.

Did you know that Office Furniture & Design Centers offers a chair adjustment service? One of our qualified associates will come to your place of business to show you how to properly adjust your chair.

These days task chairs aren't as simple as an "up and down" adjustment.

With an average of 3—5 levers on each chair, it can get a little confusing.

We offer ergonomic training and chair adjustment at no charge to all of our past, present and future customers!

Why is it so important to have your chair properly assessed and adjusted? A comprehensive chair and ergonomic assessment benefits the worker by improving comfort. A comfortable employee is a more efficient employee.

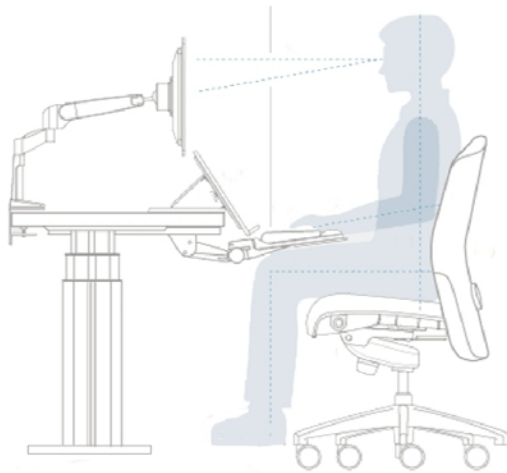

When you are sitting for an eight hour shift, or longer, you want to make sure you

are in the ideal position.

Call Office Furniture & Design Centers today at 242-7575 to schedule an associate to come visit with you about correct ergonomic settings and adjustments.
