& Custom Color options

**Versa**<sup>Cabinet</sup> — A classic product and a refreshing solution

**Versa**<sup>Cabinet</sup> is a complete revisit of the Presentation Cabinet that Egan Visual introduced nearly 40 years ago. Created to handle modern applications like data projection and designed to meet the demands of the highest aesthetics. Available in 48" w x 42" h, or

60" w x 48" h sizes to solve your meeting room requirements. Features include a flipchart with tearbar, a choice of clear aluminum or black anodized body with marker groove, tackable fabric panel with flipchart option and an EganCloth Caddy.

# Egan Presentation Cabinets—Wood or Etex

Optional Reference Shelf

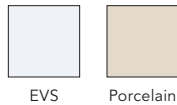

Flipchart with tearbar

8 Select Veneers  
9 Etex Colors

Marker groove with EganMarkers

Pull-Down Projection Screen:  
Optional on EVS—Standard on  
EganBoard Porcelain .

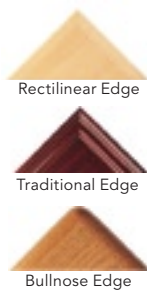

EVS Write or  
EganBoard Porcelain

Great dry erase surfaces—Guaranteed-to-clean

Low glare EVS Write or  
Porcelain with Pull-down Projection Screen

## Wood Cabinets

Features include hand selected, solid hardwoods and veneers in the species of your choice. Book matched face veneers reveal the woods natural characteristics.

## EtexCabinets

Features include Etex polymer coating, a solid catalyzed finish with a slight texture that hides fingerprints. Etex is attractive, durable and easily maintained.

## Egan Presentation Cabinets—The standard since 1967

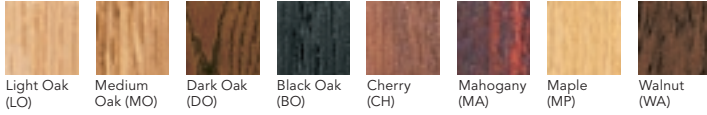

Egan Presentation Cabinets set the stage with a strong, dynamic design focal point. At a mere 3" deep when closed, Egan Cabinets easily mount on the wall with a simple cleat. The interior doors feature a Flipchart, and a tackable fabric panel on the inside of both doors.

Your choice of EVS or Porcelain writing surface. Pull-down projection screen standard on Porcelain models. Options include second Flipchart, PermaGrid (Porcelain models) pull-down projection screen (EVS models) and cabinet door locks.

# Cabinet Finish Options

Versa<sup>Cabinet</sup> doors may be specified with Wood Veneer or Etex Color

## Wood Veneer Finishes

The unique tool for generating, capturing and presenting ideas.

technology

EVS is a patent pending technology that features a non-permeable optical coating, fused to an opaque white polyester support base. The revolutionary surface is then laminated to a thick layer of Lexan™ to provide dimensional stability. The resulting laminate is manufactured into several formats to meet various customer requirements.

### Take the EVS Test-Drive

- Write on the EVS surface with a dry-erase marker.
- Wait a minute, then erase. Use the amazing EganCloth for the best results—It eliminates ghosting and dry-erase dust.
- If you used a permanent marker by mistake, grab a dry-erase marker and use it to scribble directly over the permanent marking, then just wipe it clean.
- EVS Projection also features a low-gloss surface that is ideal for projection.
